

REMOTE IT SOLUTIONS

Remote IT administration gives you the flexibility and security in knowing that Byte x Byte is always there to troubleshoot, backup, and upgrade your systems even when you're not at the office.

At Byte x Byte, LTD., ethics and security are two of the most important Issues our clients face in day-to-day business. We always suggest to incorporate a "Technology Use" policy and outline specifics of what to include so that employees are aware and responsible of applications they use and sites they visit to minimize virus and spyware risks.

Security holes and risks are also assessed as many small businesses are not aware what to look for, or know that they exist altogether. We can review your network structure and points of entry to minimize any security risks and exposures to the vast internet world that could potentially harm your business network.

- Byte x Byte prides itself in its high regard to ethics.
- Network security is one of leading concerns in IT.
- Keeping up with the latest anti-virus software is key.
- Personal Identity theft is also increasing in the U.S.
- Staying safe is staying informed.

Byte x Byte, LTD.

IT SUPPORT SOLUTIONS

- REMOTE ADMINISTRATION.
- REMOTE DATA BACKUP
- PERSONAL AND BUSINESS.
- HARDWARE AND SOFTWARE.
- DATABASE & WEB-DESIGN.

Dependency on technology is no longer an option for small business. It is a necessity if your business is going to compete in today's marketplace. Internal efficiency and external relationships depend on reliable up-to-date technology and a company that can guide yours through today's complexity with the accurate knowledge and ease of integration. Of course, technology is not the only concern at Byte x Byte (pronounced "Byte by Byte"). We pride ourselves in superior customer care and complete satisfaction.

flexible solutions for your business needs

APPLICATION MANAGEMENT

Most small companies rely on a select few applications to drive their business. Byte x Byte can design the right application for you that is easy to navigate and use. If there are specific applications you already have, we can provide solutions to manage your data efficiently and have it backed up daily to guarantee safety and reliability. We can even learn your application to teach you and your employees.

ENTERPRISE MANAGEMENT

Larger businesses require enterprise-grade solutions. We rely on technologies like Oracle, Microsoft and Symantec to help us customize solutions for your enterprise needs. We can implement new solutions to your existing structure to enhance server-to-workstation efficiency, appropriate network storage solutions, and meet data integrity requirements.

CUSTOM SOLUTIONS

From complex database-driven applications to simple and more basic designs, we'll tailor and build an application suitable for your needs.

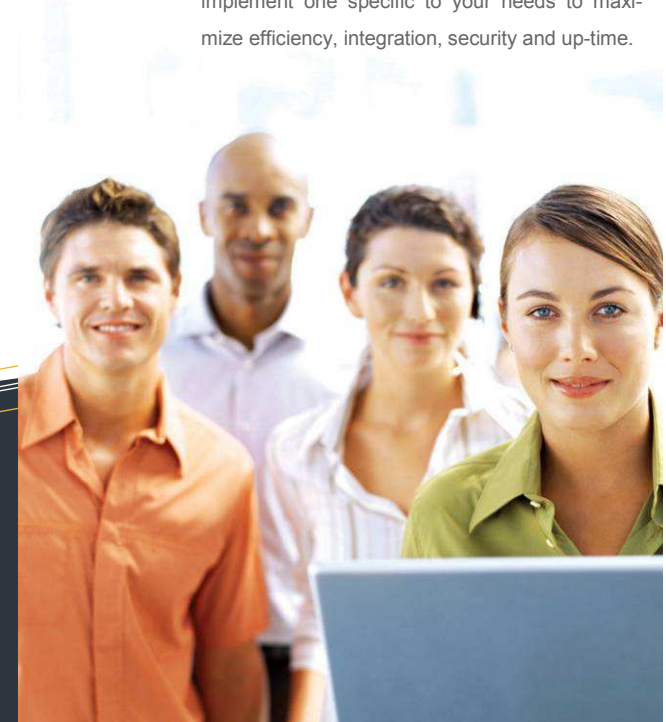

WEB SOLUTIONS

Need a website? Byte x Byte can design one for you. We host the website, provide email addresses, and design your space just the way you want.

NETWORKING SOLUTIONS

Byte x Byte will support your current network infrastructure and environment. If you do not currently have one in place, we can design and implement one specific to your needs to maximize efficiency, integration, security and up-time.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?

With a clientele list in industries that include both public and private sectors - Insurance, Finance, Local Government, Non-Profit, Real-Estate and Retail (just to name a few) - Byte x Byte can provide custom solutions regardless of your industry.
